JOB INTERVIEW PREPARATION III Assignment

You will have to prepare a printed document for your interviewer including the following information:

1) JOB ADVERT

Include the job advert of the job position for which you are doing your interview. It can be a real ad (in English or in Spanish) or one written by you. It should include: position title, name of the company, job responsibilities, and requirements.

2) CV

Make sure your CV matches the job requirements and highlights the skills that are more suitable for the advertised position.

3) COVER LETTER

Write a cover letter in response to the job advert.

4) 6 “common questions” from the list and your answers to them

You must choose six of the following questions and answer them. Remember to include specific information and examples that relate to the job responsibilities and requirements.

- Can you tell me about yourself?
- Why do you want to work here?
- Why should we hire you?
- What are your strengths?
- What are your weaknesses?
- Tell us about a difficult challenge you had to overcome in the workplace.
- Why did you leave your last job?
- Where do you see yourself in five years?

5) 4 specific questions you anticipate and your answers to them

You should be prepared for any question the interviewer may ask you. In addition to the basic questions above, you will be asked more specific questions related to the job position you want to fill and the company you want to be part of. In the answers to these questions you should show that you know the industry and the company in depth (goals and objectives, business philosophy...), together with your future role and responsibilities in that company. Each answer should always include an example that can be related to your previous work experience, leadership experience, projects developed, academic studies...

6) 2 questions you may ask at the end of the interview

Imagine that at the end of the interview the interviewer asks you, “Do you have any questions for me?” In that case, you shouldn’t answer “No” because that shows lack of interests. You should think about at least two questions in advance and include them in the document. There is no need to include the answers, as they will be given by the interviewer. Then, a good answer would be something like: “Yes, in fact I do. I’ve read about your new product “Google Assistant”. I am really interested in learning more about your plans for this product. How do you plan to position the product and in which market do you plan to focus on this product?”
